# A. SCAFFOLDING & STRUCTURES

# SCAFFOLDING

FIFA FAN FESTIVAL (QATAR 2022) – AL BIDDAA PARK

## TECHNICAL SERVICE

- Engineering service with design
- 3<sup>rd</sup> party certification
- 2d and 3D design
- Ground Testing
- Installation and dismantling
- Material rental / sale

# SCAFFOLDING & STRUCTURES

WINTER WONDERLAND QATAR – LUSAIL

## TECHNICAL SERVICE

- Engineering service with design
- 3<sup>rd</sup> party certification
- 2d and 3D design
- Installation and dismantling
- Material rental / sale

# PVC DOME

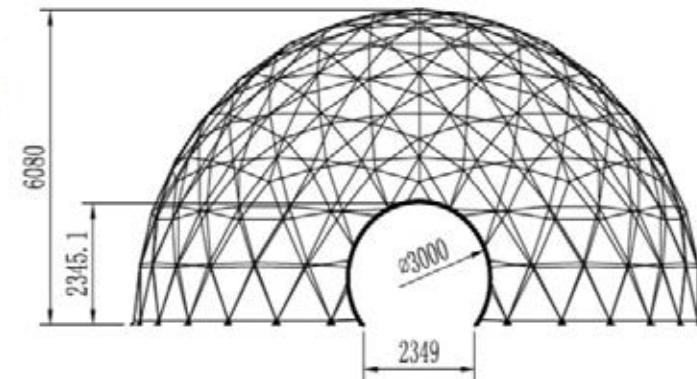

## PVC DOME TECHNICAL SPECIFICATIONS

**Cover Material:** 850g/sqm PVC, waterproof, UV resistance, and fire retardant

**Color:** White or transparent  
**Frame Material:** hot dip galvanized steel  $\phi$  25x1.5

**Height:** 6M  
**Door:** 1 PVC door 2.4\*2.4m  
**Area:** 113 SQ.M.

**GW:** 1178kg  
**Max. wind load:** 100km/h  
**Tolerance Principle:** DIN ISO 8015  
General Tolerances DIN ISO 2768 – mK  
**Surface Quality Principle:** DIN ISO 1302

# COMPOSITE TIMBER

Composite timber Pergolas have a unique formula that provides the very best of both worlds, a long lasting material that is strong, durable and weathers extremely well.

Composite Timber Pergolas are striking yet have traditional appearance, require little maintenance and will not splinter.

The material is UV stabilized and above all eco-friendly with an 87% recycled material content.

## Composition:

60% - Recycled Wood

27% - Recycled Plastic

13% - Performance Additives

## Features:

- No painting or treating
- UV resistant
- Color stable
- Minimal Maintenance
- Does not splinter
- Long life span
- Eco Friendly

## Benefits:

- Hassle free
- Designed for extreme climates
- Aesthetically pleasing
- Requires only basic cleaning
- Touch Safe
- Future proof Solution with expected 25+ year service life.

## Applications:

- Beach Areas
- Hotel Buildings
- Gardens
- Roof Gardens
- Theme Parks
- Villa Complexes
- Parking Areas

# FABRICATION

A. Steel Works

C. Laser, CNC Cutting, Large Format Printing, Styrofoam Cutting

E. Carpentry and Woodworks

F. Signs

## B. GRAND-STAND

The image shows the interior of a large temporary grandstand. The structure is composed of a dense network of metal trusses and beams, creating a complex, geometric framework. The roof is supported by a series of vertical posts. In the background, rows of seating are visible, though they are somewhat obscured by the structural elements. The lighting is dramatic, with a strong blue and purple hue on the left side, transitioning to a more neutral, slightly dimmer light towards the center and right. The overall impression is one of a massive, industrial-scale temporary structure.

All design specifications of our temporary grandstands and seats address the specific requirements of the Life Code® Handbook published by the United States of America National Fire Protection Association (NFPA) and Uniform Building Code of America (UBC).

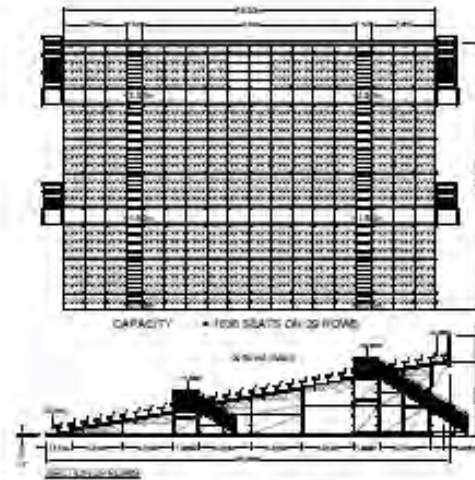

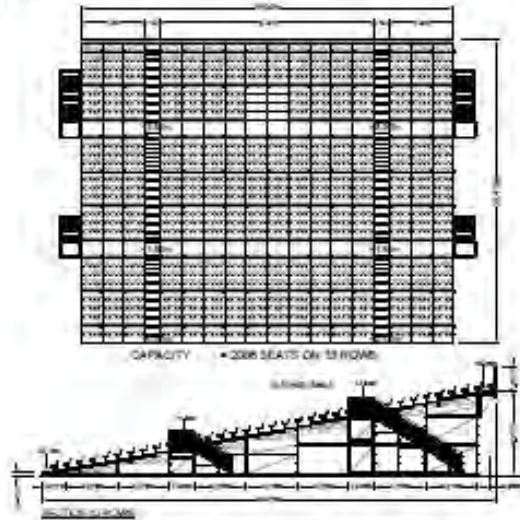

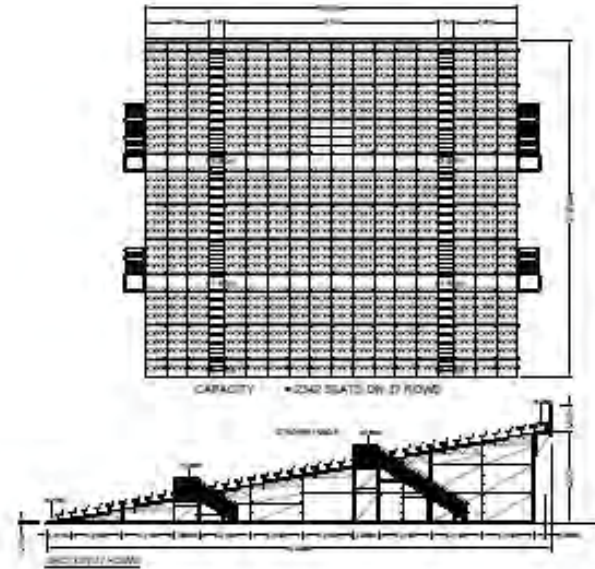

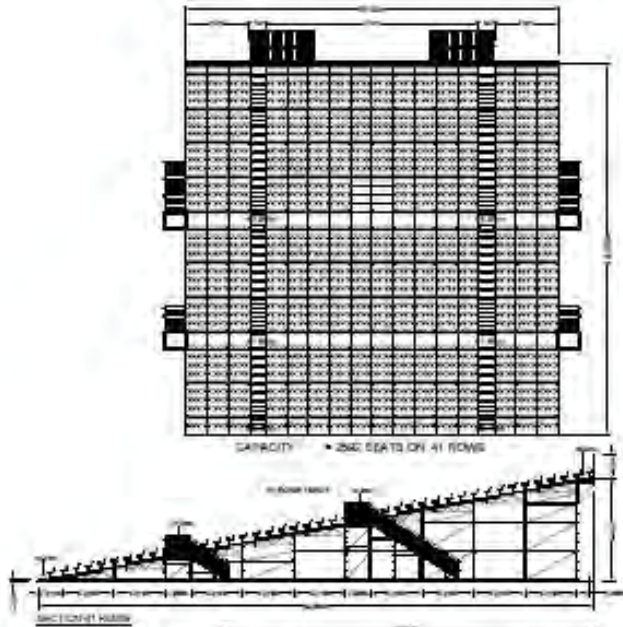

---

## SEATING STRUCTURE & STAGES

KSS ensures a complete and successful implementation of every grandstand setup, our experience in the market enables us to provide our clients with the best bleachers design solution.

# STANDARDS & CODES OF GRAND- STAND

In order to make Grandstand usable worldwide,  
We have adopted the following standards &  
codes as followed:

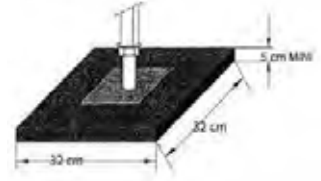

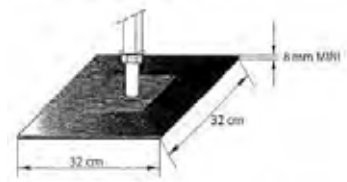

- **UNITED STATES OF AMERICA**  
All design specifications of our temporary grandstands and seats are address to the specific requirements of the Life Code® Handbook published by the United States of America National Fire Protection Association (NFPA) and Uniform Building Code of America (UBC).
- **AUSTRALIA**  
The design specification of grandstands are all compliant to the Uniform Building Code of Australia (BCA).
- **EUROPEAN NORMES**  
EN 13200-6 Spectator facilities: Demountable (temporary) stands.

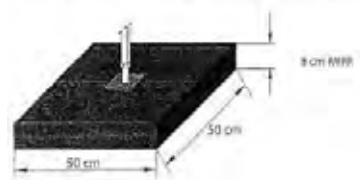

• Concrete Ground-bearing Capacity  
Pakar Jack Base 0.15m x 0.15m

• Macadam Ground (Bitumed Road) -  
Bearing Capacity : 300Mpa  
Steel Plate or Timber Plate 0.32m x 0.32m

• Normal Ground, Humus  
- Bearing Capacity : 120Mpa  
Steel Plate or Timber plate 0.50m x 0.50m

# FOOTING & TEMPORARY OF GRANDSTAND

# SEATS

## Seat Units

Steel framed seat units are fixed to the frame units with integral hooks and are locked onto the frame with a hidden locking bolt. The seat units when not in use are designed so that they nest intimately together to provide extremely compact storage. Seats are made of U.V. stabilized Polypropylene with bright and smooth appearance. 3 type of seats:

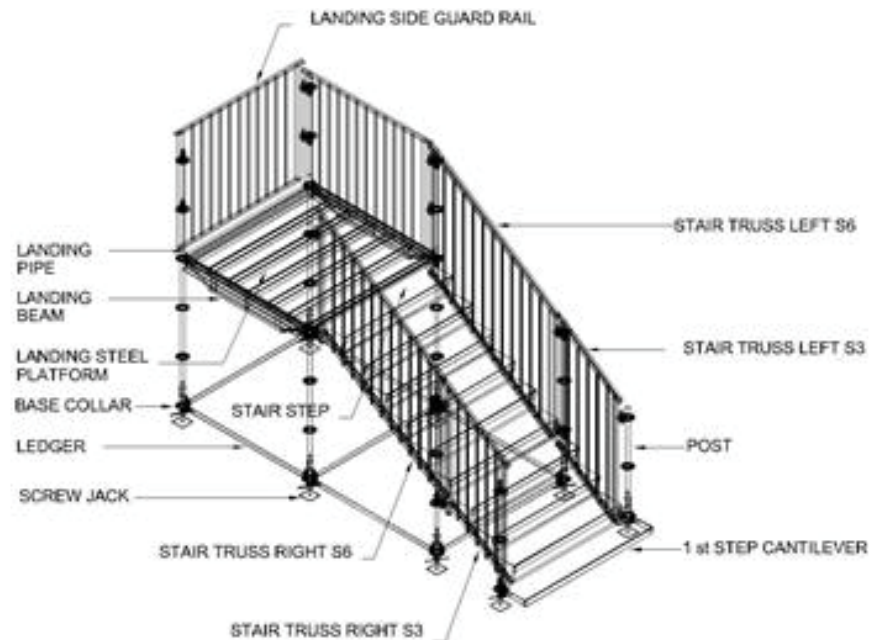

— **Bucket Seat**  
**VIP Seat**

— **Tip-Up Seat**

# STAIRS

The Stairs System is very versatile and can be used as:

Access to Grandstands.

Access to Stages and Platforms.

Access to Double or Triple Storey Structure.

Access to Pedestrian Bridge.

Temporary Public Access to any existing building.

The **Stairs system** is in conformity with the latest regulation for public areas. Live load up to 7.5kN/m<sup>2</sup> and Guardrails supporting loads up to 2kN/m.

Width: 1.50m, 2.00m or 2.50m Step riser: 166mm.

The **Stairs Solution** relies on a Ring-Lock scaffolding system and can be adapted to other type of scaffolding as: Cuplock, Kwickstage, etc...

# C. LOGISTICS & MACHINERIES

# Logistics & Machineries

Transport, lifting & Logistics Solutions

## EQUIPMENT HIRE & LEASE

Our heavy construction equipment rentals company has been serving for the last 6 Years.

We provide services in Qatar and Lebanon.

We supply all heavy equipment rentals including cranes, Man lifts, Scissor lift, Telescopic booms, Tower Lights, welding machines, Air Compressors, Generators and much more.

All our equipment are well-maintained, certified and thoroughly inspected, so you can rely on our offered services.

## CUSTOMER SERVICES

Logistics operators need to offer personalized experiences to multiple segments of customers. We automate the process, provide real-time tracking, save time

& effort on the managerial level while giving end users/consumers an improved service

## TRANSPORTATION

WeTransport scope of services in transportation includes all types of trucking, trailers and equipment to handle a wide variety of requirements. No matter what the industry or region, WeTransport caters to individual requirement with an immediate and fast delivery.

## SOLUTIONS

Our Team develop advanced solutions solutions feature a compelling and high level of reliability and can be easily installed in various types of Projects.

We work closely with our customers, architects and consultants to understand their expectations and requirements perfectly. Meeting their needs has always been our priority.

Therefore, we always consider the planned elevator application, space, quality and budget to offer customized lift solutions.

We are committed to delivering innovative and designed for performance lifts that make a significant impact on our customers' business

# E. EVENT HEALTH & SAFETY

# Event Health & Safety

Health and Safety for the workers at your event begins before the contract is awarded to your contractors. Your contractors will need to be vetted to make sure that the ones you choose have thought ahead about workers' safety.

Getting a copy of your Health & Safety Program distributed to the contractors before they arrive at the site lets them know what is expected of them to keep your event safe.

During the Build and Run-of-Event you will need "Boots on the Ground" to manage the Health and Safety of your workers/volunteers
