

WE PREPARE. TO PREVENT.

2024 CATALOGUE
SAFETY GEAR / SOLUTIONS
FOR A SAFER TOMORROW

Welcome to the NC Safety Consultants 2024 Catalogue,

At NC Safety Consultants, we are more than just a brand; we are a commitment to safety and a guardian of precaution. With the principle of "We Prepare. To Prevent." guiding every product we design and every service we offer, our catalogue is an extension of this very promise.

Inside these pages, you'll find not just products, but solutions crafted to ensure that every tomorrow is safer than today. Our safety gear is the result of relentless innovation, rigorous testing, and a deep understanding of what it takes to protect you in every environment by our well chosen suppliers.

We invite you to explore our range of safety solutions, knowing that with every selection, you are choosing the standards of safety. Let's prepare for a future where every task is carried out with the utmost confidence and security.

Here's to creating a safer tomorrow, together.

Warm regards,
The Team at NC Safety Consultants

RESPIRATORY PROTECTION

DISPOSABLE

Comfort Group **3M**

N95 without valve Sweeping, sanding, grinding, sawing, bagging - Comfort and durability
R95 Carbon filter against particles

Available in various pack sizes

Comfort Group Plus **3M**

N95 with Cool Flow exhalation valve Sweeping, sanding, grinding, sawing, bagging and operations releasing heat or dust

Available in various pack sizes

Welding Group and Metal Casting **3M**

N95 with Cool Flow exhalation valve Welding, metal cutting and casting, grinding, buffing, smelter, laboratory, petrochemical operation and bonding application

Available in unit pack

Class 100 Group **3M**

N100 with Cool Flow exhalation valve Against non-oil particles. Suitable for working in an environment with air-borne particles
Against base and non-oil particles. Suitable for the pharmaceutical industry

Available in unit pack

RESPIRATORY PROTECTION

REUSABLE

Reusable Masks **3M**

The 3M series 6500 and 7500 respirators, complete and half masks are very light. They also feature filters and replaceable cartridges, and are low maintenance, simple and comfortable to use.

Available in different sizes

Full Mask **3M**

Full Face Mask, designed for comprehensive coverage and superior comfort. This PPE masterpiece features advanced filtration, a wide field of vision, and a lightweight, balanced design, making it ideal for extended wear in demanding environments.

Cartridges **3M**

Versatile cartridges and filters provide comprehensive protection against various hazards, including organic vapors, acid gases, and particulates. Designed for safety and efficiency, they are suitable for a wide range of applications.

Available in various pack sizes

Cartridges **NORTH**

Versatile cartridges and filters provide comprehensive protection against various hazards, including organic vapors, acid gases, and particulates. Designed for safety and efficiency, they are suitable for a wide range of applications.

Available in various pack sizes

Reusable Masks **NORTH**

The 7700 serie masks are made of allergen-free silicone and are well adapted for most faces. The cradle suspension also makes this respirator very comfortable and allows for a uniform tight joint without any pressure points.

Available in different sizes

RESPIRATORY PROTECTION

POWERED AIR PURIFYING RESPIRATORS

Heavy Industry Powered Air Purifying Respirator Kit

The 3M Versaflo Heavy Industry Powered Air Purifying Respirator Kit, TR-300N+ HIK is a complete, ready-to-use High Efficiency (HE) PAPR system for industrial applications. Helps provide protection against particulates.

Heavy Industry Powered Air Purifying Respirator Kit

The 3M™ Versaflo™ Heavy Industry Powered Air Purifying Respirator Kit, TR-600-HIK is a complete Powered Air Purifying Respirator and includes everything required to get started. This ready-to-use kit provides a simple way to purchase a complete PAPR system for use in rugged environments such as industrial, demolition, grinding, metal finishing, and casting operations.

Heavy Industry Powered Air Purifying Respirator Kit

The 3M™ Versaflo™ Powered Air Purifying Respirator Heavy Industry Kit is a complete Powered Air Purifying Respirator featuring an Intrinsically Safe motor/blower and including everything required to get started. This ready-to-use kit provides a simple way to purchase a complete PAPR system for use in rugged industrial environments. The new standard in intrinsically safe protection – The TR-800 is a PAPR blower rated at Division I for Classes I, II, and III under the most current UL standard (UL 60079, 6th Edition, 2013)

Cleaning Product For Respirators

Non-alcohol cleaning pad

PERSONAL PROTECTION

Disposable protection clothing
Other personal protection

PERSONAL PROTECTION

DISPOSABLE

MicroGuard Protection Clothing

Protection suit against dry and liquid toxic particles. It offers a micro-porosity waterproof protection. Economic against dirt, grease and light chemical splashes. Fitted with a zipper, an integral hood, elastic wrists and ankles. Applications : asbestos handling and disposal, lead occurrence, manganese and silica.

Available in various sizes and pack of 25pc

MicroGuard Cool Suit Breathable Protection Clothing

Ideal for hot environments. MicroGuard frontal protection and (SMS) MicroGuard back panel.

Available in various sizes and pack of 25pc

ChemGuard 1 Protection Clothing

Economical protection suit, Level B protection against chemical products. Well suited protection for manufacturing, chemical clean-up, chemical products handling. Double zip fasteners, an integral hood, elastic cuffs and ankles.

Available in various sizes and pack of 6pc

Bouffant Cap

Polypropylene.

Available in different colors

RESPIRATORY PROTECTION

REUSABLE

Disposable Shoe Covers

The 3M series 6500 and 7500 respirators, complete and half masks are very light. They also feature filters and replaceable cartridges, and are low maintenance, simple and comfortable to use.

Available in different sizes

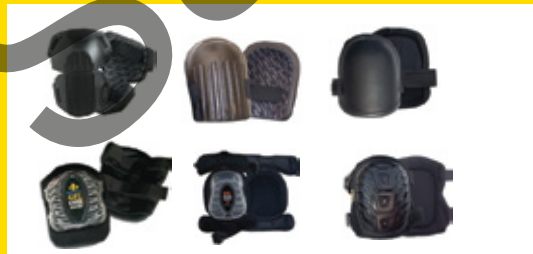

Apron

PVC protective apron, yellow

Knee Pads

This knee pad features an articulated hard shell with grooved surfaces to prevent slipping and a foam lining for comfort. It includes high-density foam for easy sliding, comfort gel and dual straps for enhanced protection and stability, along with a strap system to avoid discomfort behind the knee. Covered in durable material.

Knee Pads

Solid foam rubber 1-in thick, closed cells with built-in handle. Cannot be compressed and does not absorb liquids. No silicone and fully washable. Designed for kneeling in difficult conditions such as cold or on hard, wet and dirty surfaces. Impervious to oil products.

Available in regular and large size

HANDS PROTECTION

Glove size | Dexterity | Resistant to cuts | Performance and anti-vibration | Gloves High visibility | Leather | Welding Accessory
Disposable Gloves | Chemical Resistant

HANDS

PROTECTION

FABRIC USEFUL INFORMATION

Dyneema®

- Very strong polyethylene fiber 15 times stronger than steel on a mass for mass basis
- Very high resistance to cuts and abrasion
- Very good resistance to UV and chemical products.
- High energy absorption from tension and traction.

Kevlar® / Aramide

- Outstanding resistance-weight properties very high tough, and high indentation factors
- High resistance to heat and cuts
- Low flammability

Polyester

- High resistance to stretching and shrinking
- Weak drip when wet or dry
- Cracking and abrasion resistant
- Easy to wash

Synthetic Fiber

- Effective and economic protection against cuts
- Outstanding resistance to abrasions and chemical products
- High thermal conductivity
- Easy to wash

Vinyl

- Humidity resistant
- Plastic material, very solid and long-lasting

Spandex

- More solid, more long-lasting, and higher retractive force than rubber
- Light, soft and comfortable
- Resistant to abrasion and to deterioration caused by skin oils, sweating, lotions or detergents

Nylon

- Outstanding strength
- Abrasion resistant
- Resistant to harming due to oil and many other chemical products
- Weak humidity absorption

Cotton

- Extremely soft and comfortable
- Machine washable
- Solid and long-lasting
- Light and breathable

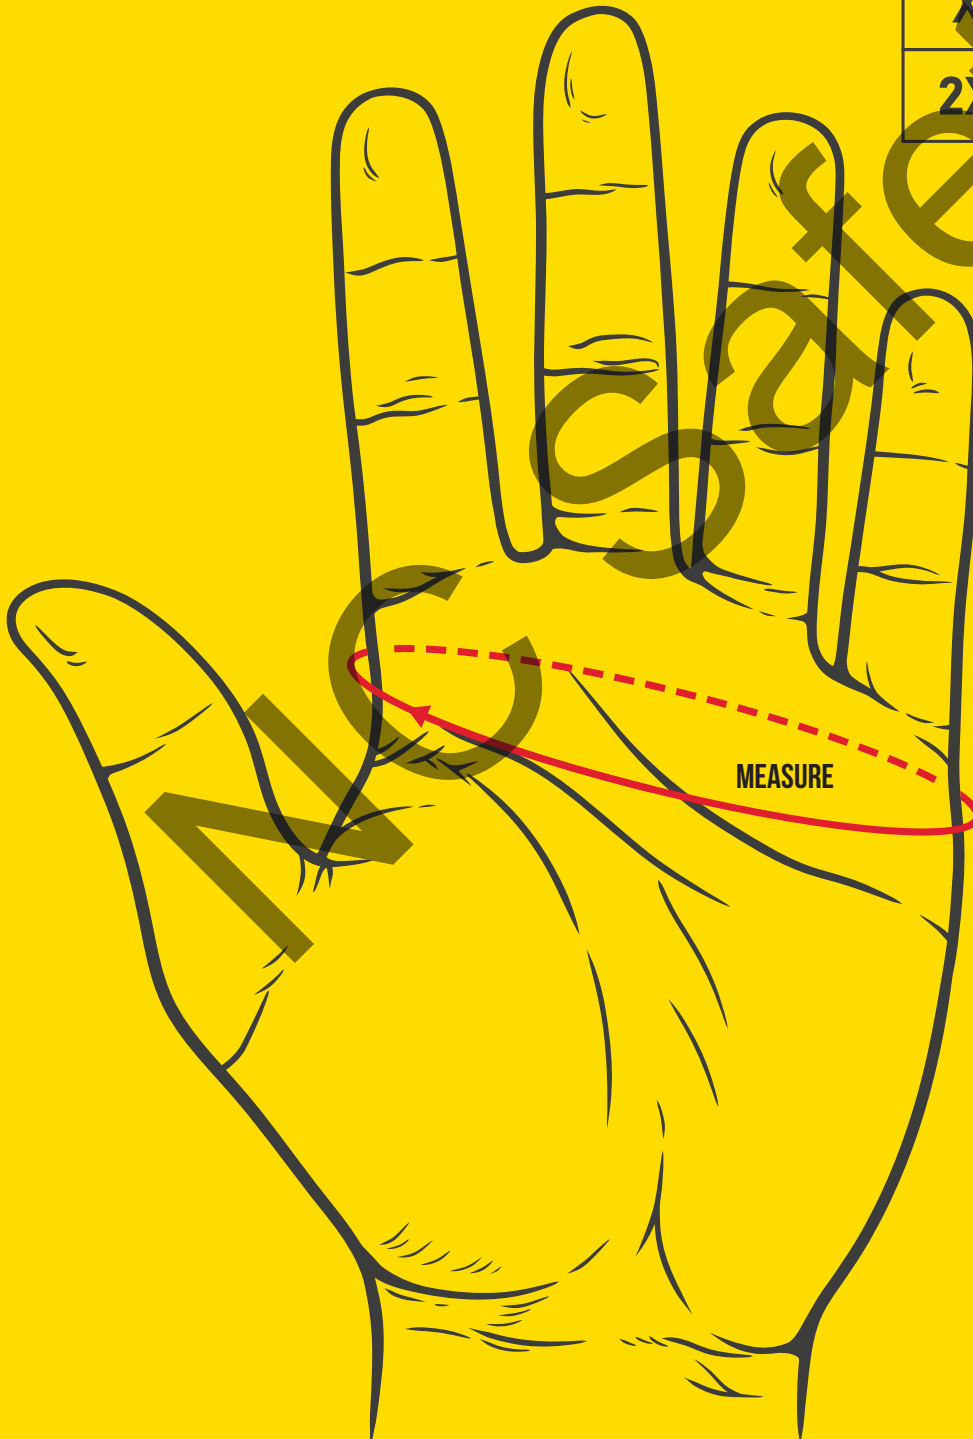

HANDS PROTECTION

GLOVE SIZING GUIDE

For maximum comfort, it is essential to measure properly.
If your hand measures 6.5 - 7 inches, choose size 7, Small.
If your hand measures 7.5 - 8 inches, choose size 8, Medium.
If your hand measures 8.5 - 9 inches, choose size 9, Large.
If your hand measures 9.5 - 10 inches, choose size 10, XL.
If your hand measures 10.5 - 11 inches, choose size 11, XXL.

SIZE CHART

Size	Inches
XS	7
S	8
M	9
L	10
XL	11
2XL	12

Red multiple clamp 1-1/2 in

FALL PROTECTION EQUIPMENT

The ABC of fall protection | Classification | Anchors
Harness and lanyard | Retractable lanyard
Life line and fall prevention device | Accessories

FALL PROTECTION EQUIPMENT

THE ABCS OF FALL PROTECTION

A typical Personal Fall Arrest System (PFAS) incorporates three components, often described as the ABCs of fall protection. The anchorage/anchorage connector, body support and connecting device—when used together— form a complete system for maximum worker protection. But don't forget the other important components of a comprehensive fall protection program: descent and rescue, education and fall protection for tools.

A Anchorages

are a secure point of attachment. Anchorage connectors vary by industry, job, type of installation and structure. They must be able to support the intended loads and provide a sufficient factor of safety for fall arrest.

B Body Support

harnesses distribute fall forces over the upper thighs, pelvis, chest and shoulders. They provide a connection point for the worker for the personal fall arrest system.

C Connectors

such as energy-absorbing lanyards or self-retracting lifelines that connect a worker's harness to the anchorage.

D Descent and Rescue

devices are used to raise or lower a fallen injured worker to safety or retrieve them from a confined space.

E Education

is essential. We offer a variety of training and consultative services to fit your needs.

F Fall Protection for Tools

helps make work environments safer and more productive by reducing dropped object incidents.

FALL PROTECTION EQUIPMENT

CLASSIFICATION AND SIZE CHART

Classification For Harness Operations

GROUP A

Individual fall protection

Group A complete harnesses are designed to carry the body during and after a fall.

GROUP D

Suspension and fall control

Group D complete harnesses are designed to interrupt or fall control.

GROUP E

Limited access (Evacuation)

Group E complete harnesses are designed to support a worker going into a confined space.

GROUP L

Climbing a ladder

Group L complete harnesses are designed to be used with fall prevention system including a stop device sliding vertically on a safety rope or rail.

GROUP P

For job stabilization

Group P complete harnesses are designed to set the worker in the right position during an operation.

FALL PROTECTION EQUIPMENT

ANCHORS

Sliding Beam Anchor

Sliding Beam Anchor fits 3-1/2" to 14" wide I-beams (9 cm to 35.5 cm) up to 1-1/4" thick (3.2 cm).

The Sliding Beam Anchor offers a portable and adjustable anchorage solution, effortlessly moving along beams for continuous protection and flexibility in work positioning.

Web Tie-Off Adaptor

Web Tie-Off Adaptor, pass-through type. Our Web Tie-Off Adaptor is a durable, flexible solution for creating secure anchor points, ideal for a variety of work environments and height safety systems.

Concrete D-ring Anchor

Secure and versatile, our Concrete D-ring Anchor provides a reliable anchorage point for fall protection, easily attaching to a wide range of concrete structures.

FALL PROTECTION

EQUIPMENT

HARNES AND LANYARD

Optimized Safety

Our Harness and Lanyard systems are designed for superior safety and comfort, featuring adjustable fittings and shock-absorbing technology for optimal fall protection in any work environment.

Optimized Safety

Our Harness and Lanyard systems are designed for superior safety and comfort, featuring adjustable fittings and shock-absorbing technology for optimal fall protection in any work environment.

Shock Absorber Lanyards

Shock Absorber Lanyards reduce fall arrest forces, featuring durable materials and stretchable design for safety and freedom of movement.

FALL PROTECTION EQUIPMENT

SRLS

Twin-Leg Self Retracting Lifeline

The Twin-Leg Self Retracting Lifeline, is a self retracting lifeline (SRL) designed with a speed sensing brake system that stops a fall within inches to keep you safe when you're working at heights. Equipped with galvanized steel cable, thermoplastic housing and corrosion-resistant hardware, this lifeline also includes a swiveling anchorage loop, steel rebar hooks and a built-in connector for twin-leg direct attachment to a harness. Specially engineered for foot-level tie-off, this lightweight SRL stays out of your way as you work, retracting as needed to minimize trip hazards.

Twin-Leg Self Retracting Lifeline, Web

The Twin-Leg Self Retracting Lifeline, 3100414 is a durable self retracting lifeline (SRL) with a speed-sensing brake system that stops a fall within inches to keep you safe when you're working at heights. Equipped with polyester web, this lifeline also features corrosion-resistant hardware—self-locking swiveling snap hook, a triple locking carabiner and swiveling anchorage loops. A built-in connector for twin-leg direct attachment to a harness makes it convenient to attach this SRL system to a harness. Designed with the worker in mind, this SRL moves with you as you work and offers nearly double the working area of a lanyard without falling slack.

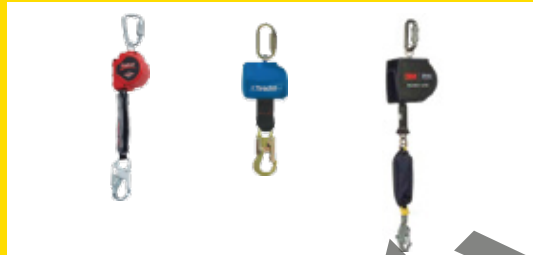

FALL PROTECTION EQUIPMENT

RETRACTABLE LANYARD

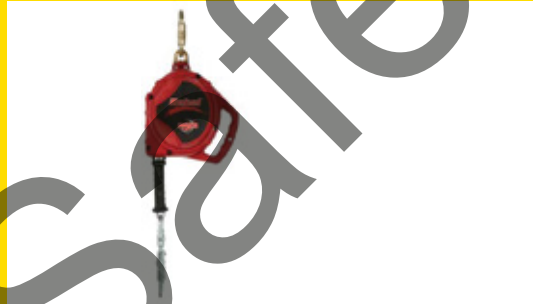

Retractable Lanyard

Retractable Lanyards offer adjustable length for freedom of movement, with automatic retraction to ensure safety and convenience at height.

Self Retracting Lifeline –Cable

The Self Retracting Lifeline, 3590500 is a durable self retracting lifeline (SRL) with a speed-sensing brake system that stops a fall within inches to keep you safe when you're working at heights. Equipped with (5 mm) stainless steel wire rope, this high-strength cable lifeline also features a carabiner, a steel, self-locking snap hook and swiveling anchorage to make it easy to connect this SRL to most safety harnesses. The SRL's lightweight design means it stays out of your way for comfort and ease of use.

SRLS: CLASS-SRL-R

The Lock - Self Retracting Lifeline, Retrieval/Bracket, Cable

The Lock self retracting lifelines (SRLs) are rugged, yet extremely lightweight and superbly engineered devices you can count on for safety, efficiency and comfort. Stainless steel components, an anti ratcheting brake system and a semi sealed design provide the user with a system built to last. An SRL's lifeline will extend as the user moves away, and retract automatically enabling the user to move about within a recommended working area at normal speeds. Should a fall occur, a speed sensing brake system will activate stopping the fall and reducing the forces imposed on the user to safe levels.

Drum Spill Containment Pallet

4 drum - This pallet has the characteristics of sturdy structure, forklift operation, non-slip, and suitability. When leakage or spillage occurs during dispensing, all the leaked liquid will automatically flow into the tray or the platform along the tray or the platform grid.

Defibrillator

The ZOLL AED Plus® is the first aid kit designed for inexperienced rescue workers. The AED Plus is a sophisticated unique design : it helps the rescue worker during the whole CPR procedure. For the ZOLL, a SAD not only must deliver an electric shock, but also help the rescue worker deliver a proper CPR. **on order only**

Retention Basin

These retention basins are designed for retaining spills and vehicle leaks, machinery, tanks, cans and other industrial equipment.

EVENT SAFETY PRODUCTS

Crowd Control Barriers
Temporary Fencing
Chemical Toilets
Outdoor Mist Fans

EVENT SAFETY

PRODUCTS

Crowd Control Barriers / Bike Racks

The Crowd Control Barriers, also called Bike Racks or Crowd Control Barricades, are lightweight and rapid-deploy crowd management solutions.

HIGHLIGHTS

- Lightweight, easy, and quick to install and take down
- Easy installation is suitable for dry hire

Temporary Fencing

Temporary Fencing is an excellent choice for various locations, such as construction sites, festival sites, or plots.

This provisional barrier serves to keep out unapproved staff, establishes secure routes around hazardous areas, and offers visual guidance, thereby improving safety for all individuals present at the location.

HIGHLIGHTS

Simple assembly and disassembly

- Ease of installation makes Temporary Fencing suitable for dry hire
- Flexible

EVENT SAFETY

PRODUCTS

Chemical Toilets

Chemical Toilets provide seclusion and maintain privacy, even when thousands converge. The toilet is always accessible for rapid use when speed is essential.

Portable Restroom w/ Sink

Portable Restroom with a Sink is equipped with a toilet, a sink, a light, an extractor, a paper towel holder, and is wonderful for the outdoors. We understand that you want to find a comfortable and clean spot as a lavatory.

Event Safety Staff Gear Kit

Our Event Safety Staff Gear Kit bundles essential PPE items including high-visibility vests, noise-canceling earplugs, durable gloves, and protective eyewear, curated to ensure the safety and comfort of staff during any event.

Outdoor Mist Fans

This mist fan is ideal for outdoor events, offering a refreshing breeze over a 300 sq ft area. With a large 50L tank for extended use and variable speed settings, it ensures guests stay cool and comfortable at gatherings, festivals, or commercial events

Neck

CHILL'N WORK

BEAT THE HEAT PRODUCTS

Evaporative Cooling Vest

Soak in cold water and enjoy cooling relief and comfort. Hot conditions are tough on workers and productivity. The Chill'N-Work Series provides cooling through evaporation to keep workers comfortable all day long.

- Water-repellent liner and black cotton-poly elastic trim
- Activated, polymer-embedded fabric inside
- Quilted nylon outer later
- V-neck with zipper closure
- Nylon

NCS-EVAPORATIVE COOLING VEST-GCC2024-1- LIME

Changing Cooling Vest

The Chill'N-Work® Premium Phase Change Cooling Vest by NC Safety with Packs keeps workers cooler, safer and more productive, maintaining a 64° F (18° C) temperature for up to 4 hours when activated. The adjustable hook and loop closures at the shoulders and waist provide a customised and comfortable fit, while two pen slots on the right side of the vest keep your writing utensils handy. They are designed for more visibility on busy streets or job sites.

Safety Features:

Maintains constant 64°F/18°C for up to 4 hours
The cooling lifecycle lasts up to four hours
Hi-Vis reflective striping for added visibility
Flame resistant

Materials/Fabric:

Modacrylic cotton blend FR fabric

Other Features:

Packs recharge in as little as 10 minutes
Adjustable hook and loop closures on both shoulders and waist
Extended vest surface area enhances cooling power
Fabric meets ASTM F1506 per NFPA 70E (CAT 1)
No airflow required •Lightweight and adjustable
Machine washable

NCS-PHASE CHANGING COOLING VEST-GCC2024-2- ORANGE

CHILL'N WORK

BEAT THE HEAT PRODUCTS

Circulatory Cooling Vest

The circulatory vests are the most advanced and the coolest (temperature-wise) of the cooling vests. Based on technology developed by nasa, these vests and one shirt work by circulating cool water through non-kink tubing around the wearer's body. As this water moves through the system, it removes heat from your body, which cools you down. This water then flows back through the system unit to a reserve of ice-cold water. The circulating water then automatically cools before being re-circulated around the vest.

NCS-CIRCULATORY (PUMPED WATER) COOLING VEST-GCC2024-3- BLUE

Cooling Neck

Soak in cold water and enjoy cooling relief and comfort. Hot conditions are tough on workers and productivity. The Chill'N-Work Series provides cooling through evaporation to keep workers comfortable all day long.

- Garment Type Head Band
- Cooling Method Evaporative - Soak
- Cooling Yes
- Maximum Cooling Time Up to 4 hours
- Material Cotton

- Closure Type Elastic Tie Band
- Adjustment Type Elastic
- Size Universal
- Overall Width 5-1/2 in
- Ultraviolet Protection Factor 50
- Features Anti-Odor Treatment, Instant Cooling Relief, Low-Profile Design, Reflective Accents

NCS-HIGH-PERFORMANCE COOLING CAP-GCC2024-5- LIME

CHILL'N WORK

BEAT THE HEAT PRODUCTS

Evaporative Cooling Vest

The Chill'N-Work Evaporative Hard Hat Cooling Pad straps into hard hats to deliver four hours of cooling relief. The low-profile and lightweight liner pad features advanced PVA cooling technology for instant cooling without bulk or slime, making it comfortable to wear under hard hats. This hard hat liner pad fits most hard hats and safety helmets, easily and securely attaching to the suspension with two hook & loop straps.

- Instant cooling relief - hyper-evaporative PVA quickly activates with water for up to four hours of cooling.
- Fits most hard hats & safety helmets – hook & loop straps securely attach to suspension low -profile – for no-bulk wear under hard hats comfortable –
- 100% cotton reusable – re-wet to reactivate cooling
- Machine washable // air dry.

NCS-EVAPORATIVE HARD HAT COOLING PAD-GCC2024-6- BLUE

Evaporative Arm Sleeve

These lightweight arm sleeves offer moisture-wicking comfort when dry and activate cooling when wet, providing immediate temperature regulation and sun protection during outdoor activities or in warm environments.

Powerful Evaporative Cooler

Experience unparalleled cooling efficiency with our top-of-the-line evaporative cooler, designed for maximum airflow and optimal evaporative media. Ideal for shops, warehouses, outdoor events, and athletic facilities, it efficiently cools large spaces where traditional cooling methods fall short. Note: This product is intended for use in well-ventilated areas and is not recommended for indoor residential spaces or areas without adequate airflow.

ORDER POLICY

PRICE ESTIMATION

Custom Quotes: As our prices are not listed on the website, we provide custom quotes for all orders. These quotes are based on the specific quantities requested and the geographic location of delivery.

Inquiry Process: Customers are encouraged to contact us directly through ppe@ncsafetyconsultants.com for a personalized quote.

ORDER CONFIRMATION

Provisional Orders: Orders are only considered provisional until a formal quote has been accepted.

Acceptance: Acceptance of the quote, through an email confirmation and down payment, will confirm the order.

PRICING VARIABILITY

Disclaimer: Prices vary according to order quantities and geographic locations. As such, each quote is unique and valid for a limited time period, as specified in the quote.

Price Changes: We reserve the right to adjust prices based on changes in market conditions, product availability, or other factors.

PAYMENT TERMS

Advance Payments: We require advance payments, for all orders.

Payment Methods: Accepted payment methods will be detailed in the quote.

DELIVERY AND SHIPPING

Shipping Costs: Shipping costs will be included in the quote and may vary based on the delivery location.

Delivery Times: Estimated delivery times will be provided but are subject to change due to unforeseen circumstances.

NO CANCELLATION OR MODIFICATIONS

Firm Commitment: Once an order is confirmed, it cannot be canceled or modified. We encourage customers to review their orders carefully before confirming.

Exceptions: Any exceptions to this policy are at the sole discretion of NC Safety Consultants.

LEGAL COMPLIANCE

Lawful Use: All orders must comply with applicable laws and regulations.

Dispute Resolution: Any disputes will be handled in accordance with the jurisdiction and laws of UAE.
